SBC 3550	carrying wallet for 6 Compact Discs

POWER SUPPLY**Batteries**

- Open the battery compartment (fig. 2) and insert as indicated six (preferably Alkaline) batteries, type R6, UM3 or AA-cells. You may also use rechargeable NiCad batteries.
- Remove the batteries if exhausted or if they are not to be used again for a long period.

Note: If there is no display indication after inserting fresh batteries, move the ON/OFF switch to OFF and back again to ON.

The battery supply is switched off when the 9 V DC socket is in use. When changing over to battery supply, pull out the plug from the 9 V DC socket.

9 V DC socket

Via the 9 V DC socket, you can supply the CD-player with 9 V/400 mA Direct Current through a 5 mm DC-plug, \oplus - \ominus - \ominus minus-pole \ominus to the 1.9 mm centre pin.

- At home, you can connect the CD-player to the wall socket using a suitable AC/DC mains adapter, e.g. type SBC 3565 (EM 1020). Always remove the mains adapter from the wall socket when the set is not in use.
- In your car, you can connect the CD-player to the cigar lighter socket, e.g. using the supply cable from the optional car accessory kit SBC 3555.

Note: If there is no display indication after connecting an external 9 V DC supply, move the ON/OFF switch to OFF and back again to ON.

CONNECTIONS - fig. 1-2**Two stereo headphone sockets PHONES**

For stereo headphones (or mini loudspeakers) with 3.5 mm plug.

Output socket LINE OUT

3.5 mm stereo socket for CD-reproduction through your stereo system (amplifier, receiver, recorder, etc.).

- Connect the LINE OUT socket, using e.g. the signal lead SBC 1059, to the input sockets REC IN, TAPE IN, LINE IN, AUX or CD IN of the other set. The LINE OUT output signal is not affected by the position of the VOLUME control.

PLAYING A DISC

- Set the ON/OFF selector to ON.
- Connect one or two pairs of headphones to the PHONES sockets.
- Adjust the sound with the VOLUME control.
- Press OPEN to open the disc cover.
- Fit the disc, label side facing up, over the spindle of the turntable (fig. 3-4).
- Close the cover. The CD-player starts and '---' appears on the display as a sign that the CD-player is scanning the contents list of the disc. After that, the total playing time and the number of tracks present on the disc appears on the display and the CD-player stops.
- Playback will start by pressing PLAY \triangleright . As soon as playback starts, the display shows the track number 1 and the elapsed playing time of the 1st title. When the 2nd title is reached the track number 2 appears, etc.
- For brief interruptions, press PAUSE \square . The word PAUSE then appears. To continue playback, press PAUSE again.
- The CD player goes to position STOP:
 - by pressing STOP \square or OPEN;
 - when the end of the disc is reached;
 - by setting the ON/OFF selector to OFF;
 - if the batteries run down or if the power supply is interrupted in another way.
- To take out the disc, open the disc cover by pressing OPEN.
- To switch off the set, place the ON/OFF selector to position OFF.

Remarks

- The CD-player is able to play the normal 12 cm disc as well as the small 8 cm disc 'CD-single'. An adapter ring for 8 cm CD-singles is not required.
- If the batteries get exhausted, the CD-player switches off automatically. After inserting fresh batteries or connecting an external 9 V DC supply, move the ON/OFF switch to OFF and back again to ON.
- If the display shows the character 'E' for ERROR, the CD-player cannot read the disc. Possible causes are:
 - you inserted the disc the wrong way (the label should face up);
 - the surface of the disc is badly scratched or dirty, see 'Maintenance';
 - the lens \otimes (fig. 5) is steamed up because of a sudden transition from a cold into a warm environment; do not clean the lens, but let the set acclimatize for a while.

HOLD - INTROSCAN - REPEAT

HOLD

During **PLAY ▶** you can set the ON/OFF selector to position **HOLD**. The buttons are then made inoperative (except for **OPEN**). Now, playing a disc is not interrupted when a button is accidentally touched. This is useful when carrying the player with you. For operating the CD-player, place the ON/OFF selector to position **ON** again.

INTROSCAN

The **INTROSCAN** function can be switched on both from the **STOP □** and the **PLAY ▶** position.

- Press **INTROSCAN**. The word **SCAN** then appears. Only the first few seconds of each track on the disc are played, but always from the 1st track number. After playing a few seconds of one track, the CD player jumps to the next track. The display always shows the corresponding track number.
- The moment that you press **PLAY ▶**, the **INTROSCAN** function is defeated (the word **SCAN** disappears) and the disc is played in the normal way from this track number.
- If you press **▶▶** or **◀◀**, the **INTROSCAN** function remains operative and the beginning of the next **▶▶** or previous **◀◀** track is played for a few seconds.
- If the **INTROSCAN** function is not defeated by pressing **PLAY ▶** or **STOP □**, then the CD player automatically returns to **STOP** as soon as the end of the disc is reached.

REPEAT

If you want to repeat the whole disc (or the stored selection) continuously, press the **REPEAT**-button: the word **REPEAT** appears on the display.

The **REPEAT** function can only be switched on during **PLAY ▶**.

To defeat the **REPEAT**-function, press **REPEAT** again and the word **REPEAT** disappears.

SEARCH **◀◀ - **▶▶****

SEARCH **◀◀ - **▶▶****

These buttons have three different functions:

1. Press briefly (less than 1 second) during **PLAY** or **INTROSCAN**

▶▶ - go to the next track (title)

You can jump to the next title by pressing **▶▶** once. The next track number appears on display, playback is interrupted and the next track is played.

If you want to skip more than one track, then press **▶▶** more than once until the display shows the desired track number.

◀◀ - go to the previous track (title)

If you want to repeat the running title from the beginning, press **◀◀** once: playback is interrupted and the same track is played from the beginning. If you want to repeat one of the previous titles, press **◀◀** more than once until the display shows the required track number.

2. Keep pressed (longer than 1 second) for search during **PLAY**

In this way, the disc is played at high speed in the forward **▶▶** or backward **◀◀** direction. The sound is reproduced partly and at high speed, however, it is still recognizable. In this way you can locate rapidly a certain passage within a track.

Keep the button **▶▶** (search forward) or **◀◀** (search backward) pressed until you recognize the required passage. Then release the button: the disc will be played back in the normal way from this passage.

If the button is pressed longer than 10 seconds, the search speed increases automatically.

3. When programming: press briefly (less than 1 second)

When programming - in position **STOP □** with a disc inserted - you can select the desired track numbers using **◀◀** and **▶▶**, see chapter 'Programming - 1. Manual selecting'.

PROGRAMMING TRACK NUMBERS

You may select a number of tracks and store these in the memory in the desired sequence. When playing, you will only hear the stored titles in the selected sequence. At most, 26 tracks can be stored in the memory. You may store each track more than once.

Manual selecting

- Load the disc, but do not press PLAY ▶ yet.
- Select the desired track using the buttons $\triangleleft\triangleleft$ and $\triangleright\triangleright$ until the display shows the required track number.
- Store this track by pressing STORE.
- Select and store in this way all desired titles.

Storing during INTROSCAN

- Press INTROSCAN to play the first few seconds of each track.
- Press STORE as soon as you recognize a desired title.

Storing during PLAY

- During normal PLAY you may store the running title by pressing STORE.

– After pressing STORE the character 'P' (PROGRAM) appears, indicating that the track has been stored.

– Store all desired titles in the required sequence. You may store each track more than once.

– At most, 26 tracks can be stored in the memory. When the memory is full, the character 'F' (FULL) appears.

– When pressing MEMORY, the display will show in sequence all stored track numbers.

– You can simply erase the whole memory by pressing CLEAR: the character 'C' for CLEAR appears now.

The contents of the memory are also erased:

- by opening the disc cover using OPEN;
- by setting the ON/OFF selector to OFF;
- if the batteries get exhausted or if the power supply is interrupted in another way.

How to play the stored selection

To play your selection, the CD-player should be in position STOP; then press PLAY ▶: now, the word MEMORY appears.

GENERAL MAINTENANCE

- The mechanism of the CD-player is fitted with self-lubricating bearings and therefore must not be oiled or greased.
- Fingerprints, dust and dirt on the apparatus can be removed using a soft, clean and slightly damp leather cloth. Do not use any cleaning agents which contain abrasives or solvents such as benzine thinner, alcohol, refined petrol or ammonia, since they may affect and harm the cabinet.
- Do not expose the set, batteries or discs to rain or moisture, or, for any great length of time, to excessive heat from heating equipment or direct sunshine, e.g. in cars parked in the sun.
- Keep the set and the discs away from sand

CD-PLAYER AND DISCS

- The lens (X) (fig. 5) should never be cleaned.
- The lens may steam up when the set is taken from a cold into a warm environment. Playing a disc is not possible then. Do not clean the lens, but let the set acclimatize for a while.
- Always pick up the disc by the edge (fig. 3) and put it back in its box immediately after use.
- To remove dirt from a disc, first breathe on the disc and wipe it off in a straight line from centre to edge (fig. 6) using a soft, lint-free cloth. The use of cleaning agents may harm the disc.

This product complies with the radio interference requirements of the European Community.

The type plate is located on the base of the set

GARANTIE EN SERVICE IN NEDERLAND

• Wat wordt gegeraardeerd?

Philips Nederland B.V. garandeert dat dit apparaat kosteloos wordt hersteld indien - bij normaal particulier gebruik volgens de gebruiksaanwijzing - binnen 12 maanden na aankoopdatum fabricage- of materiaalfouten optreden.

• Wie voert de garantie uit?

De zorg voor de uitvoering van de garantie berust bij de handelaar die het apparaat verkocht heeft. De handelaar kan daarbij eventueel een beroep doen op een der Philips Service vestigingen.

• UW aankoopbon + de identificatiekaart

De identificatiekaart is uw garantiebewijs. U kunt alleen een beroep doen op de bovenomschreven garantie tegen overlegging van de aankoopbon (factuur, kassabon of kwitantie), in combinatie met de identificatiekaart, waarop typenummer en serienummer zijn vermeld. Uit de aankoopbon dienen duidelijk de aankoopdatum en de naam van de handelaar te blijken. Mocht het noodzakelijk zijn deze documenten van u handelaar af te geven, dan kunt u hem daarvoor een ontvangsbeleid wagen. De garantie vervalt indien op de genoemde documenten iets is veranderd, doorgehaald, verwijderd of onleesbaar gemaakt. De garantie vervalt eveneens indien het typenummer en/of serienummer op het apparaat is veranderd, doorgehaald, verwijderd of onleesbaar gemaakt.

• Hoe te handelen bij een storing?

Om onnodige kosten te voorkomen, raden wij u aan bij storingen eerst nauwkeurig de gebruiksaanwijzing te lezen. Indien de gebruiksaanwijzing daaraan geen uitzondering biedt, kunt u uw handelaar raadplegen en/of hem het apparaat ter reparatie aanbieden.

• ...en bij problemen?

Bij problemen omtrent de garantie-uitvoering kunt u zich in verband stellen met **Philips Nederland B.V., Afdeling Consumentenbelangen, Antwoordnummer 500 - 5600 VB EINDHOVEN** (postzegel niet nodig), of **040-78 11 78**.

GARANTIE FÜR DIE SCHWEIZ
